Courses and Certifications

> Full-Stack camp (Internship) **CGS-team** 🎓 September 2024
> Javascript Internship (Full-Stack) **Binary Studio Academy** 🎓 (About) Jun - Aug 2024

About Internship:

Great Javascript Full-stack intensive with lessons, tasks and deadlines. Three-month internship consisted of 13 lessons and homeworks, covering advanced frontend and backend concepts. The most challenging tasks for me were working with WebSockets, Docker & Jenkins, and re-structuring the backend. Eventually I was able to complete all assigned tasks.

⚙ Stack: Typescript / HTTP, REST API / WebSockets / React, Vite / Redux, RTK / CI / CD / Docker / JS-Testing / DB, PostgreSQL / Node, Express / Javascript Patterns / ReactNative

Projects where I implemented functionality:

Movie app - fetching movies by categories from TMDB; *load more*, and *favorite movies* functionality.

Booking Travel App. - navigation using React Router; - protected routes, authentication; - token saving; - booking a trip via pop-up functionality; - search filters;

JS: Database and SQL - in this task, I learned how to build SQL/PostgreSQL databases, tables, diagrams, and relationships.
